NECESSARY PAPERS READY IF A RECOUNT **DECISION IS REACHED**

Time Limit Expires at 5 O'Clock Today and Storrow Voters Are Urging Him to File an Application.

ONE WARD-PETITION

Many Storrow voters have urged a recount of the ballots in his interest, and it is understood that an application therefor is fairly well assured, although no definite statement on the subject ould be obtained up to 2 p. m.

William C. Pree, secretary of the Citizens Municipal League, says that he has the necessary papers from most of the wards and expects to have them from all of them before the close of the time for filing, which is 5 o'clock today. He says that he will file whatever papers he has, even though he may be a few wards short, which he does not believe will be the case. Mr. Pree says that he will also file for a recount in the cases of Messrs Buckley, Stone and Lane.

William M. Prest at the Storrow headquarters says it has not yet been determined whether a recount will be asked or not. A meeting, he says, will be held this afternoon, at which this question will be decided.

The general reason for asking for a recount is that whatever may be the personal feelings of Mr. Storrow, some of his supposters maintain that he owes! it to them to ask for a recount. A great number of requests by mail, telephone and otherwise have come to headquarters since the result of the election was known, and all these will have weight at the meeting this afternoon.

Joseph Lomasnev has asked for a recount in ward 8 as to the vote for candi dates Attridge, W. L. Collins, Hale and Mayor-elect John F. Fitzgerald will at

DR. DAVID SNEDDEN ADVOCATES CHILD'S **VOCATION BUREAUS**

Proposed Agencies Would Collect Information of the Various Industries for Use of Parents and Students.

MASS MEETING HELD

Speakers at Fancuil Hall Urge More Stringent Laws Against Child Labor in New England and Nation.

Vocational bureaus in connection with the public schools of America, to assist were advocated today before the sixth annual child labor conference at Boston University by Dr. David Snedden, commissioner of education for Massachusetts.

The noon mass meeting at Faneuil Felix Adler chairman of the national of Boston read an original child labor poem which was followed by addresses the National Consumers League, Rabbi Stephen S. Wise of the free synagogue of New York, and Hooper Alexander of Atlanta, Ga.

The theme of Mrs. Kelley's address was that New England is holding the rest of the country back. Not one of the New England states, she said, gives its working children the blessings of an eight-hour day.

Rabbi Wise spoke on the general misfortune to the nation of child labor and Hooper Alexander told in a humorous vein of the anti-child labor movement as t affects the South.

By Dr. Snedden's plan as outlined in his address at Liberal Arts building, Boston University, clearing houses would be established to inquire into the various industries and supply parents and their children an amount and kind of information which can be provided from no other source.

Dr. Snedden explained that the complex industrial system of today has resulted in unfavorable conditions for child workers, and voiced his opinion that public measures are necessary to remedy existing evils.

Dr. Snedden said in part:

workers encounter, one that greatly appeals to the sympathies, is the helpless ness and ignorance with which the majority of young people face their wageearning careers. Under the simpler life which existed before the development of our present economic system, the home was the natural agency which adjusted the child to its vocational career. In the more highly developed trades and crafts

"Today, especially in urban life, it is impossible in most instances for the boy to follow his father in industry or to obtain satisfactory introduction to it under the apprenticeship system. Stil. less is it practicable for the girl, who great industrial competition, to be satisfactorily trained for and adjusted to the economic situation into which she is expected to fit

"It is hardly fair to blame the individual employer for this situation for it is the industrial system as a whole The Civic League of New England will which makes possible this absorption of

"It is inevitable that sooner or later best fitted. Already in Edinburgh and the Glasgow area such agencies exist. and as a part of their work they are making careful studies of the employ-

ment possibilities in these regions. "If it seemed desirable it would be quite possible to maintain in connection with our high schools and upper gram-NEW YORK-Bradstreet's in its issue A very precise measure of the building mar grades, especially in our large cities, activity of the past five years is to be information bureaus which could serve the purpose of vocational direction for

DARTMOUTH TRACK ATHLETES REPORT TO COACH HILLMAN

Hurdles and Weight Events Will Prove to Be Hardest Ones to Fill Satisfacto-

PALMER IS CAPTAIN

HANOVER, N. H .- The Dartmouth varsity drack squad was called out Thursday afternoon and from now on hard work will be the order of events. Harry Hillman, the crack New York sprinter, who has recently been appointed to coach the team has arrived in Hanover to take charge of the work. A mass meeting was held in College hall Thursday night and Mr. Hillman took this opportunity to urge all men interested in track sports to come out and try for a place on the team. This will be quite essential this year as the application of the freshman rule will deprive the team of any stars that the freshman class may have.

Many of the old men who are still in college have been on the track for some time and from now on they will be given especial attention in preparation for the B. A. A. games to be held Feb. 12. At these games Dartmouth is matched against the fast M. I. T. team. The college has been invited to meet the teams of Williams and Cornell in a relay race at the meet of Co. A, 10th Regt. of N. Y. to be held at Albany. As these games come during the period of examinations the team will not be able to attend. Several other invitations have been extended to the management and Coach Hillman hopes that most of them will be accepted for he is an ardent believer in gaining practical experience.

Coach Hillman plans to give especial that the colleges have not done enough presence of a few good men of that stroke separated them. type will be an excellent method of gathering in a few extra points.

In the weight events the two Marden boys are hammerthrowers of fair ability. while Tobin and Sherwin are men that Hills third, in 82; Charles Presbrey, Fox close the motorists are beginning to give could well compete in the shot put. MUCH INTEREST IS

Motorists Now Regard That Part of Automobile Industry More Important Than Formerly.

REEVES APPOINTED

NEW YORK-With but two more days of the A. L. A. M. automobile show at Madison square garden left, there seems to be no let-up in the attendance and it is generally believed that if it were to be continued another week, the crowds would continue to come to the end. Thursday's attendance was fully up to that of any day during the week, and it continued to be of the class which is greatly interested in the motor car industry, both as purchasers and learners.

It is a surprise to many that there is no falling off in the public interest and it is a matter of wonderment where all the people come from, notwithstanding the fact that New York is a pig town. It has often been predicted that the novelty of automobile shows would soon wear away, but as long as there is such a pronounced public demand tor facturers will continue to go to great PRINCETON WILL expense in providing educational shows for the benefit of people who are really interested in the wonderful developmen of the motor car.

As was rumored Wednesday, Alfred Each of First Men in the Reeves, formerly general manager of Advertisers' Golf Tourney the A. M. C. M. A., has been appointed manager of the licensed association and will at once take hold of his new duties Much speculation is being indulged in-PINEHURST, N. ELEVATED ROAD VOLUNTARILY GIVES MEN THIRD RAISE IN PAY

THE Boston Elevated railway has put in effect today, for the third time in seven years, a voluntary increase of the pay of its employees. The company has announced increases that will amount to \$100,000 a year.

Under the new scale car-house station masters, highest grade, will receive 30 cents an hour; inspectors and starters. highest grade, 281/2 cents an hour; elevated motormen, highest grade, 281/2 cents an hour: surface conductors and motormen, highest grade, 26 cents an hour. The next grade of conductors and motormen will get 25.3 cents, the next 24.7, the next 24.1 and the next 23.5. Elevated guards of the highest grade will received 241/2 cents an hour, and brakemen of the high-

est grade 22 cents an hour. Not only the 15-year man (first grade) but the man who has been in the employ of the Elevated for only a year benefits by this "dividend-sharing"-for it is generally recognized that when General Ban. croft decided to hand out more than \$100,000 in bonuses he was really giving back to the conductors, motormen, and others a share of what they had helped to clear for his compar

What the Students Are Doing

The Music World

New York Music

NEW YORK-In looking back from some time in the future this year's operatic season in New York might veritably be styled a "Tosca" year. It is curious that a work like that of Puccini should be presented in so short a time with so great a variety of cast.

the role of Tosca this year. She is a to succeed the second time. young woman, born in Sardinia. She as sung in the cities of Italy and in & Geneva, Warsaw, Odessa and even before the Khedive of Egypt in the course of an engagement in Cairo. She is very become in the original drama.

Mme. Milka Ternina created Tosca in year ago.

Mme. Lillian Nordica's reappearance as | Marguerite in Gounod's "Faust" last evening was the most interesting eventof the week from the personal side. Mme. & Nordica is one of the singers who helped Colonel Mapleson make his great Acadcity years ago. -Although not a regular sung the role in Paris two years before. \$10,000 for this furniture. The year before that she made her debut in Italy in "Traviata." A critic at the time of her first appearance here wrote:

"Of Mrs. Norton-Gower, the first statement must be that she gives abundant avidence of having been admirably trained in the spirit of Gounod's music and the tragedy. Nearly every number in the score which falls to the part of Margherita she sang with commendable intelligence and taste. The most obvious criticism was that the spirit so excellently conceived by her put a severe strain upon the matter in her control. It fost her a manifest effort to do what she well knew how to do, for she is not a phenomenal vocalist. She has a voice of fine texture, and her tones are gencraffy sympathetic. She sings with feeling but acts with more. Her performonce was meritorious beyond the performance of any of Mr. Mapleson's women singers. Mines. Patti and Gerster ex-

Beethoven's Fifth and Sixth symphonies in C minor and "The Pastoral" will me played by Gustav Mahler at the Phil parmonic concest this afternoon.

The New York center of the American Music Society will give the first concert of this, its second season, at Mendelssolin hall on Saturday evening. The artists taking part will be Mary Hissem De Moss, soprano, Arthur Shepherd, pianist Teacher of music, whose recitals for the little folks originated in her perception d composer, and the Hoffmann String the Boston Symphony Orchestra. At this concert will be heard the two compositions by Arthur Shepand with which he won the prizes last May in both instrumental and vocal classes in the first biennial prize competition for American composers, which was instituted by the National Federa- fitting herself to become a concert singer the nursery rhymes set to new music, is to be used for the purchase of books, tion of Musical Clubs.

ENGRAVING Ward's

President Taft's Message on Conservation

To the Senate and House of Repre-

In my annual message I reserved the subject of the conservation of our national resources for discussion in a special message, as follows:

More Details to Come

In several departments there is presented the necessity for legislation looking to the further conservation of our national resources and the subject is one of such importance as to require a more detailed and extended discussion than can be entered upon in this communication. For that reason I shall take an early opportunity to send a special message to Congress on the subject of the improvement of our waterways; upon the reclamation and irrigation of arid, semi-arid and swamp lands; upon the preservation of our forests and the reforestation of suitable areas; upon the reclassification of the public domain with a view of separating from agricultural settlement mineral, coal and phosphate lands and sites belonging to the government bordering on streams suit-

able for the utilization of waterpower. In 1860 we had a public domain of 1,055,911,288 acres. We have now 731, 354,081 acres, confined largely to the mountain ranges and the arid and semiarid plains. We have, in addition, 368, 035,975 acres of land in Alaska.

Gave Public Land Away

The public lands were during the earliest administrations treated as a by the secretary of the interior and the union for purposes of monopoly with states as possible national asset for the liquidation of the President and to authorize the secretary other water power sites, and under conpublic debt and as a source of reward of the interior temporarily to withdraw ditions that shall limit the right of use be given to issue, not exceeding \$30,000, far, if properly improved, they would rethey were donated in large amounts in recommendations as to legislation to means for determining a reasonable secretary of the interior shall find it respect to the bulkier and cheaper comaid of the construction of wagon roads meet conditions or emergencies as they graduated rental, and with some equitand railways in order to open up regions arise. in the West then almost inaccessible. President's Defense of Mr. Ballinger's Policies

WHAT I have said is really an epitome of the recommendations of the secretary of the interior in respect to the future conservation of the public domain in his recent annual report.

He has given close attention to the problem of disposition of these lands under such conditions as to invite the private capital necessary to their development on the one hand, and the maintenance of the restrictions necessary to prevent monopoly and abuse from absolute ownership, on the other.

These recommendations are incorporated in bills he has prepared, and they are at the disposition of the Congress.

I earnestly recommend that all the suggestions which he has made with respect to these lands shall be embodied in statutes and especially that the withdrawals already made shall be validated so far as necessary, and that the authority of the secretary of the interior to withdraw lands for the purpose of submitting recommendations as to future disposition of them, where new legislation is needed, shall be made complete and unquestioned.

or misuse of the lands or their products. The power of the secretary of the interior to withdraw from the operation of existing statutes tracts of land, the disposition of which under such statutes would be detrimental to the public interest, is not clear or satisfactory. This power has been exercised in the interest of the public, with the hope that mendations of the executive, and the place of natural fuels.

Irrigation Most Vital

In considering the conservation of ne natural resources of the country, the feature that transcends all others. including woods, waters, minerals, is the soil of the country. It is incumbent upon the government to foster by all available means the resources of the country that produce the food of the people. To this end the conservation of & the soils of the country should be cared for with all means at the government's

Their productive powers should have requiring a certain amount of developsoils, levee river overflow soils, grow trees on thin soils, pasture hillside soils, rotate crops on all soils, discover methgrasses and legumes for all soils, feed grains and mill feeds on the farms where they originate, that the soils from which they come may be enriched.

A work of the utmost importance to inform and instruct the public on this chief branch of the conservation of our resources is being carried on successfully in the department of agriculture, but it ought not to escape public attention that state action in addition to that of the department of agriculture (as for instance the drainage of swamp lands) is essential to the best treatment of the soils in the manner above indicated.

Big Aid to Dry Farming

made of the possibility, through a varia- gress. climate where the moisture comes from made complete and unquestioned.

WILLIAM H. TAF

The White House, Jan. 14, 1910.

survey with a view to determining the practicability of thus improving and protecting the streams for federal purposes. I think a moderate expenditure for each year for this purpose, for a period of five or ten years, would be of the utmost benefit in the development of our for-

estry system. Upward of 400,000,000 acres of forest land in this country are in private ownership, but only three per cent of it is being treated scientifically and with a view to the maintenance of the forests The part played by the forests in the equalization of the supply of water on watersheds is a matter of discussion and dispute, but the general benefit to be derived by the public from the extension of forest lands on water sheds and the promotion of the growth of trees in places that are now denuded and that nce had great flourishing forests, goes without saying.

The control to be exercised over pri vate owners and their treatment of the forests which they own is a matter for atate and not national regulation, because there is nothing in the constitution that authorizes the federal government to exercise any control over forests within a state, unless the forests are owned in a proprietary way by the federal govern-

Commercial and Industrial News of the World

A SHARP BREAK OCCURS IN THE

The activity and irregularity of the 789,000, or greater than ever before. New York and Boston stock markets the past few-days would leave no room for occurred. Prices have advanced ma complaint on the part of those who trade for a point or two profit. It has been a rich harvest for the professional trader for comparison: and particularly if he has been on the bear side of the New York market, where most of the active traders are to be found these days.

The action of New York stocks has been a disappointment to the many bulls who had figured on the usual "January Predictions were freely made toward the close of 1909 that the new unmarketed portion of the eight cro year would witness easy money and would be difficult, as authorities diff higher prices for securities. But money as to the quantity remaining on farm rates have ruled firm thus far and have There is a greater proportion of the la shown no signs of weakening notwith- crop of wheat back in the hands of t standing the enormous disbursements in farmers than ever before. There was interest and dividends this month. Then big erop in 1909, the government cred the fear of legislation inimical to corpoling Minnesota alone with 96,000,000 bus rations and other specific causes have els, the greatest crop ever raised. acted as a hindrance to bull speculation. The consequence has been that with the exception of a few special stocks the tendency of the market thus far in January has been downward.

The New York market opened this morning with much buoyancy. vances ranging from a fraction to over 2 points were made during the first half our when a great quantity of stocks came out and prices declined as rapidly as they had advanced. There was no news to account for the drop and it did not seem necessary for the bears to manufacture any as quotations sought a lower level-without much urging.

An early exception to the weakness prevailing in Wall street was Rock Island. The stock opened up 1% at 45% advanced a point further and then sold off. The preferred was up 2 points at the opening at 87. Northern Pacific again was under pressure. There has been nothing to account for the weakness displayed by this security for some time past and the selling has been attributed to liquidation by the Kennedy estate. The stock opened up 18 at 1393/8 and lost over a point during the early sales. Reading was weak. It opened exdividend at 1641/2 and sold down under 163. U. S. Rubber sold ex-rights at 495/s at the opening and improved fractionally. The preferred sold ex-dividend and ex-rights at 1131% and declined fractionally. St. Paul opened up 1/2 at 152 and lost nearly 3 points during the fore-

The Boston market showed consider able strength during the early trading. Business has been on a large scale the past two days. The trading yesterday was the heaviest in several years. In all there were over 145,000 shares of stock traded in or about three times the volume of an ordinary day. North Lake alone furnished almost 46,000 shares to the trading, or about a third of the day's

Many remarkable advances in price were made, some of which attracted little attention in the general excitement While North Lake, the center of interest was advancing 51/4 points, St. Mary's Mineral Land rose 81/4 points to 65 or dealings of about 1000 shares. North Lake opened up 3/4 this morning at 17 -but immediately sold off, declining about 2 points during the forenoon. St. Mary's Land sold at 67 at the opening today. Franklin was prominent and strong. It opened up 11/2 at 19 and rose to 21 during the forenoon. Lake Copper opened at 871/2 and sold off nearly 3 points. Superior Copper opened at 661% and sold above 68. A reaction toward midday caused a drop from the high level and in some cases all the gains were

Stocks broke sharply on the New York market during the afternoon, establishing new low levels for the movement in nearly all issues. The local market re- ton Chamber of Commerce, received the mained comparatively firm.

DIVIDENDS

The Cuba Railroad Company declared a dividend of 11/2 per cent, payable

Dividends declared by Rand gold mining companies in 1909 were £9,217,071. The Transvaal mines outside the Rand declared dividends of £184,298. The Dominion Coal Company, Ltd., has

declared the regular semiannual dividend of 35 per cent on the preferred stock, payable Feb. 1 to stock of record Jan. 21. The Boston Land Company has declared_a dividend of 25 cents a share, payable Feb. 15 to stock of record Jan. 31. This is the same amount as was

declared a year ago. The International Coal & Coke Company of Montreal has increased its dividend from 1% to 1% per cent quarterly. readily at the start. Profit taking ap- Kansas & Texas 4s....

THE COTTON MARKET.

NEW YORK - The cotton market ened weak with January up 17 points and others 1 to 18 points lower. Jan. 14.65@14.68, March 14.59@14.60, April 14.50, May 14.64@ 14.65, June 14.55.

Atwood Violett & Co.-What is known as the western crowd, that is Chicago house on Main street, and it is stated and all that section, and the Waldorf element, both of which have been, for weeks past, conspicuous on the selling side, rather over did the thing this morning, helping to sell May here down to 14.55. A reaction of nearly 40 points has followed. May selling at 14.92. Very brokers picking up everything when May was selling between 14.74 and 14.80.

> LIVERPOOL-Cotton business moder ate; prices easier: sales 8000; receipts 4000, 3700 American. American middling uplands 7.84. Futures opened easier.

GOOD PRICES

Preliminary Statement of the Bureau of Statistics Showing Value of Our Shipments to Foreign Countries.

Seventy cents a bushel for corn, \$1.04 a bushel for wheat, and practically 12 cents a pound for cotton is the 1909 record of the exports of three of the principal articles of agricultural production.

The preliminary statement of exports of breadstuffs, meat and dairy products. cotton, and mineral oil for the calendar year 1909, just issued by the bureau of statistics of the department of commerce and labor, shows that 34,704,000 bushels of corn exported were valued at \$24,-299,000, or an average of 70 cents per tion-not the copper combination in the bushel; 46,902,000 bushels of wheat, valued at \$48,978,000, or an average of \$1.044 per bushel; and 3.891,000,000 pounds of larger amalgamation of the producers cotton, valued at \$461,377,000, or an aver- of 800,000,000 pounds, or one half of the

age of 11.86 cents per pound. While these figures are stated by the bureau of statistics as preliminary and case, which, as the court ruling stands only including the exports through the today, declares that under the Sherman 411/2 principal ports of the country, they are anti-trust law, it is not necessary to sufficiently complete to give a picture of prove that a combination is in restraint the exportation of the important articles of trade, but only to show that a comof agriculture during the year.

by the same statement, show lower values ual owning a business, plant or factory than last year, though increased quanti- may purchase another for cash, a corties, the total quantity of mineral oil ex- poration cannot purchase another corported during the year being stated as poration by the issue of securities or 1,495,000,000 gallons, valued at \$99,749. other form of combination by which the 000, against 1,475,000,000 gallons, valued combination shall come into position at \$105,282,000 in the preceding year.

FINANCIAL NOTES

M. C. D. Borden of Fall River has stopped buying regular print cloths, per pound, and its permanency of dewithdrawing from the market following the continued falling of prices in the cot-39 1/2 ton market.

Official denial is made of the rumor Official denial is made of the rumor that a \$200,000,000 combination has been formed by the five principal ras compan.

Africa, around the Lake of Tanganyika, formed by the five principal gas companies of West Virginia with Standard Oil interests to control the gas output of the state.

with the necessity of imposing government restrictions on the wholesale trading in grain, cotton, etc. Gambling with the necessities of life, he believes, is not conducive to healthy trade.

A London special to the New York next October. Journal of Commerce says that the English government has been a heavy borrower in the form of two months' bills. This is a decided innovation and is due entirely to the rejection of the budget by

The Venezuelan government notifies the Panama Ore Company that it will not recognize the transfer of the rich Imataca mine to that company on the ground that title to the property is questioned. Many Americans are believed to be largely interested in the

TRANSVAAL GOLD STATISTICS.

WASHINGTON - Total profits of 65 gold mining companies in the Transvaal for October were \$4,665,647. Working conspicuous buyers today have been the costs on the Rand were \$4.09 per ton. leading cotton firm in the trade, their and rate of profit \$2.68 per ton. On Oct. 31 there were employed in the producing gold mines of the Rand 19,458 whites. 145,104 colored persons and 3204 Chinese.

FOR EXPORTS HOW PROPOSED COPPER MERGER

Legal Status, Money Market and Condition of Copper Metal Market Responsible for Delayed Combination.

OUTPUT OF AFRICA

Three things are holding back the proposed Amalgamated copper combina-Southwest, or I'm Montana-but the United States production

These are, first, the American Tobacco bination has been made which may re-The exports of mineral oil, also shown strain trade, and that, while an individwhere it may possibly restrain trade. It is contended that what the Sherman antitrust law needs is a more reasonable legal interpretation, but, as it stands, the major opinion of the court is that the issue of securities to make a combination which might restrain trade is il-

legal. Hence, until the Tobacco, and possibly the Standard Oil, case is decided by the highest court in the land, it is thought that the proposed oppper amalgamation cannot safely go forward, in a large way.

In the second place, the money markets are not at the present time propitious for the investment of banking capital in a large copper amalgamation. Some aggregation of capital has got to stand up and begin the proposed copper combination in the markets of the world with a good deal more than \$100,000,000. It is not a mere banker's proposal for exchange of securities. A large part of it must be on a cash basis, and it must be bought through, and then the burden shifted upon the investing public.

Not only must the legal situation and the monetary situation be clearer than at present, but the copper metal market must be well in hand on both sides of the Atlantic, with surplus production repressed, or otherwise taken care of. In this connection it has just been discovered by the remakers of copper investments and copper metal prices that not only three continents, but four, must

Advance. be reckoned with. gan interests, the Rothschild interests, the Guggenheims and Amalgamated, North and South America and Europe will be pretty well in hand, except for the Lake

uperior district. As the Calumet & Hecla has, by carefully laid plans, become dominant here by the investment of \$20,000,000 of cash in other companies, it may be good judgment to let this district alone and count upon its sure and steady development.

In a few years, from the present outlook, it is said that Lake Superior will pass every other copper district in the world, not only in its gross output, but in the quality of its copper, its low cost velopment.

What the copper people have just discovered, however, is that Africa is to be one of the greatest copper producers where Stanley found Livingston, is within a year to begin yielding over to the civilized world its copper treasures.

Next October it is figured the railroad President Taft has become impressed from Portuguese territory will be in touch with the copper deposits of Tanganyika, and soon thereafter 60,000,000 pounds of copper per annum should be going to the seacoast. Its development will be watched with interest beginning

TRANSCONTINENTAL RAILROAD EARNINGS ARE COMPARED

Wall Street Discounts Future Possibilities of Some Companies by Sending Prices of Their Securities Upward -St. Paul Now a Favorite With Traders.

power and market valuation of the im- ured on a basis as nearly equal for all portant transcontinentals brings out the as is possible, the relationship between salient fact that the investing commun- the figures is a simple matter. Using ity seems to regard the St. Paul road as St. Paul as the standard for gauging having greater potential value as a de- the others, the result per mile is: veloping transportation system than Northwestern, Great Northern, Northern Pacific, Atchison or Union Pacific. Char-Pacific, Atchison or Union Pacific. Characteristically, Wall street has proceeded to discount St. Paul's future, as it does Northern Pacific Northern Pacific with every new thing. St. Paul, as a

transcontinental, of course, is a new

done in the case of Great Northern and be able to carn \$10,000,000 gross and \$6,-Northern Pacific by excluding the Bur- 000,000 net this year without them. lington stock and joint bonds from their respective sides of the account; and by per mile would be \$2990, a little more deducting from the capitalization of each than Northwestern's. But the general its share of the \$56,000,000 advances to conclusion that Wall street puts a relathe Spokane, Portland & Seattle, an inependently operated road.

In the case of Chicago & Northwestern it is necessary to deduct from capitalization the \$9,695,000 debentures ssued to secure control of the Omaha. As a matter of fact, however, this investment is worth upwards of \$20,000,000 to Northwestern.

The net capitalization of Union Pacific as a transportation plant is the amount of its stock and bonds outstanding less the amount of its investment holdings. For the present purpose, we will take these at their book value, \$209,974,387.

Taking the bonds at par, and the stock at recent market prices, viz.: St. Paul common 158, preferred 172; Northwestern common 181, preferred 223; Str Admiral Farragut, New York for Great Northern 143, Northern Pacific 144; Union Pacific common 202, preferred 104; Atchison common 122, and preferred 104, the result is a close approximation of the valuation which Wall street sets upon the transportation end

of the companies. This appears so: Market Selling Str Admiral Dewey, Port Antonio for Philadelphia, 135 m n Cape Maysi 4:30 p m 13.

Str Allianca, New York for Cristobal, Str Allianca, New York for Cristobal, Cape Watlings island 4:30 p m 13.

it is fair to figure in a calculation of rate per ton mile is lower than that of its earning power an estimate of the Union Pacific and some other reads in extension's carning power during the this comparison, but for that again there first year of complete operation. This are reasons in character of tonnage and is \$10,000,000 gross and \$6,000,000 net, the like. As the figures stand, they show estimates which, by the way, have good that on present earnings the stock marbasis in the results thus far reported. ket chooses to value St. Paul above all Including these figures the earnings of the other big American transcontinentals. the five roads under review-approximate total and per mile-for the 12 months ended Oct. 31 last, have been

	as lonows.		
		Gross.	
	St. Paul		\$26,700.00

Study of the capitalization, earning earning power. These having been fig-

Market Union Pacific

It appears that the Union Pacific and This means, of course, that a part, if Chicago Northwestern properties, in the not all, of the increased earnings St. order named, are selling in the market Paul may derive from its Puget sound at the lowest figures in consideration of line and the lateral extensions thereof their earning power. To be sure, the MANCHESTER, Jan 11-Arrd, str are already expressed in the selling price earning power of the Puget Sound and of its stocks. Even allowing the earn- its branches, excellent as it already is, ings of the extension and branches at the has by no means developed; their milefigures for the current fiscal year with age has been included in capitalization which the road's best friends credit it, figures because they are practically St. Paul is selling higher on its earning financed in the St. Paul's outstanding power than any other of the roads men- stocks and bonds, and in earnings per mile figures because the latter are in-To make comparison on an even basis, tended to represent a condition of toit is necessary to strip the roads of their day. Another calculation may be made, investment holdings and regard them as excluding 700 miles of branches and asfailroads pure and simple. This may be suming that the Puget Sound itself will

> On this basis St. Paul's net earnings tively high price on St. Paul would not be disturbed, because Northwestern's market valuation still remains nearly a fifth under that of the other road, while the net earnings of the other roads would still represent a higher percentage on St. Paul's than their market valuation would in similar comparison.

> Incidentally, the relatively low price of Union Pacific is further emphasize if something like the actual instead of the book value of its investments is recognized. Ruling prices bring the real value of the latter's investments up to approximately \$340,000,000. This cludes all of the Southern Pacific stock, at ruling prices, as the \$45,000,000 bonds under which it is pledged have already been taken into account in Union Pacific's bonded debt. So deducting \$340,-000,000 instead of the book value of \$209,000,000 from Union's capitalization, the comparison of market valuation and earning power with St. Paul's appears

It should not be forgotten in the above calculation that the Pacific Coast exten sion should develop earnings the coming year for the entire system. One reason

St. Paul built to the Pacific coast was to increase the earnings of its main lines, bxs cheese, 2512 cs eggs. as well as to open new territory for development. The development on the main line earnings is a matter of the a- future, which the above calculation can- butter, 175 bxs cheese, 1161 cs eggs. et not take into account.

BIG BALANCE OF JERSEY CENTRAL

NEW YORK-Jersey Central, by rea-

To Nov. 30 surplus after charges and The regiment left Quebec for the the road has not yet fully recovered the It was disbanded 10 or 12 years ago, business lost in the depression.

Over a series of years Jersey Central earns something over half its yearly surplus in the first five months. On this basis present indications are that the road will show for the stock approximately \$5,900,000, but, for conservatism, it might be well to reduce this to \$5.500,000. An examination of surplus earnings and the disposition thereof in was floated by the rising tide just bethe past five years shows:

Appr. for Dividends Profit Surplus, add. & bet. (8%) & loss, \$4,537,987 \$2,000,000 \$2,194,944 \$343,043 5,123,473 2,000,000 2,194,944 5,782,879 3,512,062 2,194,944 5,659,705 3,373,299 2,194,944 Thus, should the surplus this year

GERMAN POTASH

in Washington nearly two months ago.

SYNDICATE OFFER NEW YORK-As a result of the failure of the German potash syndicate and the American fertilizer manufacturers to agree in their recent conferences, negotiations with American interests as a body are at an end, but further conferences with those who favor the aceptance of the syndicate's proposals will

be continued. The failure to reach some sort of an greement was laid in some quarters chiefly to the influence of the packing

interests. The situation is still acute. A maority of interests represented at the ecent meetings believe that Washington will prevail upon Germany to de feat the proposed potash law making the syndicate's control of the industry more powerful than at present. Dissolution of the syndicate would then naturally follow and a demoralization of prices might result.

Home Keeping in Southern France

Strangely in contrast with the agitation among women at home and abroad on questions of political freedom and the progressive countries. The woman of wife's thought. Public pleasures of all often be out. sorts are almost unknown to her. President Fallieres has had 20 years of public life in Paris, but his wife has never yet grown used to Paris nor tried to play the role of a great lady.

A Flamingo City

An illustrated article on bird life in Everybody's Magazine for January has the following account of a flamingo city on the coast of the Bahama islands:

Starting finally to find the swash where flamingoes had settled, a thin pink line was discerned. Ten minutes farther, and the thin pink line enlarged to a wide, flaming streak. The birds were in multitudes-"and with an utterly indescribable feeling of exultation we advanced to view this wonder of wonders in bird life!"

But when the explorer was within 300 yards the birds rose, stepped slowly forward; the leaders sprang into the air and file after file of the winged host followed. "The very earth seemed to empty birds; fiery masses streamed heavenward. It was an appalling sight."

On the following morning, risking a movement toward them, Mr. Chapman pitched his umbrella bag in the midst of the city, in the midst of the nests, within arm's reach of them. It seemed beyond probability that the behind him while he gaily plays with a spring entirely from the subject, be birds would take their places so near him. But they did; the vast red army after the fashion of a monkey on a disposal, whether you were taking it by which had retreated at his coming stick. The picture is labeled, "Who assault or by siege; and my idea of the noisily returned and surrounded him. would shatter his faith in dear old Santa aim of art was-first have an idea, and He was "engulfed in color and clarion- Claus ?"

The future of the American boy in my judgment is largely involved in his pursuing the profession of the farmer. When you look forward just consider that you are going to follow along the course of our fathers That Thou mine eyes hast opened to this and that you are going to make this country or some other country blossom as the rose. The tendency toward the city is not one that we ought to encourage. I hope that the development of the comforts of country life is such that we may look forward now to a lessening of the movement toward large cities. The place for us to accomplish things is in the country. The cities will take care of themselves."

Names Interchanged

A southern newspaper confuses the name of the president of Harvard University with that of his brother, the distinguished astronomer. The mistake is not nearly so serious as the one made by the Englishman, according to a story which the late John Fiske liked to tell. What a giant intellect that Webster of yours had!" said the Englishman to an American friend. "To think of so great a leader and statesman writing that dictionary!"-Buffalo Commercial.

Ill Timed

"You say my remarks were illtimed," said the natural born orator. "Yes," replied the colleague. "They lasted over an hour when they shouldn't have occupied 10 minutes."-San Francisco Examiner.

To always be sitting for your portrait s a poor trait of character.-Exchange.

AN AMERICAN ARTIST

In World's Work for January is a rounded by a fence of which the young delightful sketch by Elihu Vedder of his artist painted conscientiously every artistic experience. He tells how his picket. That the character of the house mother's wish to make him an artist and roof should be governed by the amount his father's to have him make money of rainfall seems a practical point of were compromised in making him an view which from Maine to Florida our architect. in his gardens. Michael was one of these and began by cutting marbles for Lorenzo's great library, which is one of the sights of Florence to this day. One day he begged a piece of cast-off marble and cut the face of a faun in it. Lorenzo came along and gave a bit of advice which Michael Angelo accepted and followed so cleverly by a single stroke that Lorenzo decided to put him forward in his art. He took him into his house and made him as his son. Michael's first famous work was the statue of the young David, carved out of a defective marble. No one but he could have posed the figure so as to avoid the defective vein and yet have something beautiful. -The David still stands in the Florence gallery, an awkward boy with great hands and feet and the sling over his shoulder, with keen gaze set presumably toward ANSWER TO YESTERDAY'S PUZZLE. The blest reality

Of resurrection power, Thy churches' dower, Life more abundantly, Lord, give to me! Frances Ridley Havergal.

The picture of Count Tolstoi setting aside his widely sought writing for the world to teach Gospel lessons to little children reminds one of our own Bronson Alcott, whose book of conversations with children on the Gospels is full of significance. While it is probable that these children would not have given such wise answers to another teacher, yet it is clear to see in following the book that said, "Neither will they be persuaded with the most careful heed to their bear- they often discerned truths which were though one rose from the dead." But ing on the lesson-sermon and in this way hid to the questioner. Aquarium Proposed for Boston

THOSE who attended any of the world's fairs held at Chicago, Buffalo or St. Louis must have observed the throngs of visitors around the illuminated aquarium tanks and the evident interest in watching the finny occupants, from the dull pickerel to the brightcolored specimens that make their homes in the tropic seas. There was fascination and delight in beholding the slow and graceful movements of the fish or the ease and

rapidity with which they could dart from place to place. Now that Boston is talking of having an aquarium, the idea will doubtless prove a popular one. New York's aquarium has an immense attendance, and affords not only entertainment but instruction. The -Zoological Society in that city has started a campaign to raise an endowment fund of \$1,000,000 for the Zoological Park and

Aquarium. Boston should no longer lag behind.

This city is the center of a fishing industry that handles \$10,000,000 worth of fish annually. Thousands are concerned in its success. It is argued that cooperation of the proposed aquarium and the fisheries of Boston would be especially desirable and practical. A movement for the establishment of a permanent exhibit of living fish at Marine park, South Boston, is being supported by the New England Fish Exchange, which recommends that money be taken in part from the Parkman fund for that purpose. It is pointed out that a fisheries museum might be made part of the new plant, containing exhibits of apparatus used in fishing, models of vessels, appliances employed in canning and curing, and photographs. The value to commercial houses would make it worth while for them to assist in establishing a permanent exhibition. A third attraction possible is the placing of a government fish hatchery and fish culture station at City Point. Thus complete information as to how sea foods are secured and prepared would be presented, and educational and commercial demands would be met. The Japanese provide schools of fishery. Splendid aquariums are maintained in numerous foreign cities, to the great advantage of their inhabitants. The reasons are many and good why Boston should have an up-to-date institution of

IT WILL hardly be disputed that the personal interest of President Taft in the maintenance of good order and harmony in the Republican party is greater than that of any other man. He is at once the highest representative and the virtual leader of the organization. He enjoys the greatest distinction it can confer and at the same time he is charged with the greatest responsibility it can place upon one of its members. The

support and loyalty of a united party is essential to the success of his administration, as the future of the party is very largely dependent upon that success. Concerned as deeply as he is, therefore, it is but natural and reasonable that he should claim and assent the right to be heard in the management and regulation of the affairs of his party. If matters are taking such shape as to threaten the solidarity of the organization, to impair its influence and usefulness, and to bring about a condition that must result in making wreckage of his policies, it is manifestly within his province to interfere and to call a halt.

The

President-

Takes a

Hand

This, it is understood, is what Mr. Taft intends to do. He is going to insist, we are informed, that the differences now existing between certain elements of the party, so far, at least, as they tend to break down discipline and to cause dissension and division in the organization, shall be adjusted. Whatever surrender of personal predilections or prejudices this course demands must be made, and it is stated that he will not on his own part permit any consideration of regard for any of those around him to stand in the way of the

restoration of harmony. Such a step will raise the President's course above the level of mere expediency, and will be recognized and appreciated by a discerning people as not only wise but patriotic. The public interests should come first, and if the President shall stand out for them, as it is promised on his behalf he will do, a united party will soon be found rallying around him.

Since they are putting \$15,000;000 in the budget as insurance for the unemployed, Great Britain's "Liberal" party appears to be deserving of the name.

Mexico's Centennial Celebration

THE elaborate preparations now being made by the people of Mexico for the celebration, next September, of the centennial anniversary of the birth of the sentiment that made their country a republic will serve to call the attention of the people of the United States to the fact that ours is by no means the only worthy example of a successful experiment in democratic form of government on the western side of the Atlantic.

It is apparent to all students of history and to close observers of conditions as they exist today that only for the fact that the star of "Columbia, the gent of the ocean," shines so brilliantly in the galaxy of nations, there are a number of other American republics which, if removed from the very trying contrast with this country's splendid achievements, would stand forth as luminaries of no mean magnitude to challenge the admiration of the world. Among the first of these is Mexico.

In a casual glance at the nations of the earth it becomes apparent that the general governmental scheme of those of the old world differs radically from the general form employed by those of the new world. In the whole of the old world-Europe, Asia and Africa-there are but two countries of special note that are republics, France and Switzerland. In the whole of the new world-North, Central and South America-there are but two countries of special note that are not republics, Canada and Guiana, both of which are overseas colonial possessions of European motherlands. Barring the section of coast where Canada borders the Pacific, and a like distance where Guiana meets the Atlantic, a traveler could start from Point Barrow, that projects from the northernmost coast of Alaska into

the icebound Arctic, journey down the western coast of the continent to Cape Horn and north again to Eastport, Me., without stepping from republican soil. Within the borders of the western continent there dwells no king, khedive, emperor, czar, shah, mikado or sultan. Whether or not this state of affairs is to the advantage or disadvantage of the new world it is not the purpose of these lines to discuss. Much depends on the point of view. All history says there have been good and bad kings and emperors, good and bad republics. It also makes clear the truth that in these later days the reign of a bad king is likely to be brief.

No matter what the professed form of government, the people rule. It is certain that the people of the United States would not care to have their good neighbor on the north, Canada, trade her constitutional monarchical form of government for that of any one of a number of the republican forms of government as they are worked out in countries lying to the southward. England's thousand years of achievement contains enough that is grand and good to make her people proud of her history and her institutions and to cause them to put their whole hearts into their exclamatory prayer: "God save the king!" Other old world peoples hold their lands and leaders in like regard.

But the fact remains that the new world is on the whole a continent of republics, and as such it ought to be a source of gratification for the people of its chief republic to observe that its neighbor Mexico, of the same general form of government, in name at least, has attained the centennial of its birth. In this fraternal republican spirit, to the extent that it obtains in both countries, the people of the United States will congratulate the people of Mexico and wish them other hundreds of years of progress and prosperity, and a still firmer position "in the parliament of men, the federation of

PRESIDENT TAFT'S appointment of Henry S. Graves as forester of the United States is a compliment to Mr. Pinchot, the deposed chief, for Mr. Graves was a protege of Mr. Pinchot and was for two years assistant chief under him in the old division of forestry. For nearly a decade Mr. Graves has been director of the Yale Forest School, which was established largely through Mr. Pinchot's efforts. Albert F.

Mr. Graves of Yale New Forester

Potter of Arizona, at present acting forester, who has been appointed as associate forester, is also known as a Pinchot man. Both appointees are in sympathy with his administration of the forestry service, and they will doubtless carry out so far as possible

the policy he had adopted.

Few have questioned the wisdom of Mr. Pinchot's plans for the preservation of our forests. Fewer still have denied that immense benefits would follow such work. And the great majority will hail with satisfaction the choice of two men who will pursue a course along the lines Mr. Pinchot has laid down. The promptness of the President's action in filling the vacancy created by Mr. Pinchot's retirement is also to be commended, for it is important that there should be no halt or delay in matters under the direction of the bureau. Of the professional fitness of Mr. Graves for the position of head forester there is no room for doubt. After a course of graduate study of forestry at Harvard, he joined Mr. Pinchot in work on the Vanderbilt estate at Biltmore. He then went abroad for technical training in European professional schools of forestry, principally at Munich, under an eminent old world forester, Sir Dietrich Brandis. Later Mr. Graves was associated with Mr. Pinchot in forestry work in New York and in the national service. Mr. Potter has been connected with the forestry department for eight or nine years. It is understood that he is well acquainted with western conditions and thoroughly informed with regard to all the policies and practises of the forest service.

Evidently there is no reason in the change of personnel to expect anything other than a perpetuation of the department's previous high standard of efficiency.

THE chief of police of a western town, who, on visiting New York refused to trust the banks and hid his money between the mattresses of his bed, would now be sadly lamenting his lack of faith, no doubt, had not the chambermaid who found his bills amounting to \$50,000 been more honest than he believed the bankers were.

Making History Study Attractive

It is safe to say that the historical incidents and events that are most deeply and permanently impressed upon the mind of the average person are those that are associated in some way with some story, poem or picture that appealed to his imagination in youth. There are people, and they are a most necessary element in society, who possess the faculty of taking in the dryest details of historical narrative; but these

people are exceptions to an almost universal rule, especially among youthful students. In the lives of many of us the time comes when we can extract real comfort from historical works that were repellent to us in our school days, but this fact only serves to convince us that a mistake was made in the method of teaching us

One of the most serious of the regrettable results of the method of such teaching that have obtained for many years is the tendency of children and young people, and frequently of older people, to seek historical knowledge in books that are attractive but unreliable. The consequence of this is that the minds of no small percentage of the people are filled with ideas of ancient and modern history that are a sad mixture of fact and fable. Now, there is no substantial reason why true history should not be entertainingly, attractively and instructively presented. There is to be a meeting of historians and economists in New York this week for the very purpose of considering this matter and agreeing upon a plan which, if carried out, will prove a corrective to an educational shortcoming of long standing. So far as tentatively approved at present, the idea includes the introduction into historical study of models, placards in colors, charts, illustrated maps, portraits and pictures, so that the mind of the student may be impressed with the facts through the medium of interesting and pleasing objects.

Already the new method has been tried abroad, especially in Germany and France, and the results are said to be satisfactory. Its introduction in this country will be observed with interest, not only among educators but among all those who are interested in the general advancement of public intelligence.

THE larger use of the franchise by women in the recent Boston election and the formation of the School Voters League, a new women's organization in this city to study public school problems, constitute only one phase of increased activity in regard to educational matters. The league hopes to bring the results of its investigations of the public schools to the attention of the public and to assist in electing suitable persons to the

Education Interest Foremost

school board. The league also aims to federate the parents' associations. Parents, as a rule, are too apathetic in matters pertaining to the schools. Should they perceive that results are unsatisfactory, they are not in most cases well enough informed as to the methods in vogue in the schools to take proper steps for reform. Greater publicity should prevail on all existing conditions.

Charles Zueblin has truly said that Boston's school system lacks most the conscientious cooperation of the citizens and the intelligent initiative of the teachers. The latter is of extreme importance. No one comes in closer touch with the pupils than the teachers and none should be able to see more clearly than they where lie the faults of the system in use and how they can be remedied. It is alleged that teachers are not infrequently in dread of "the powers that be" and do not therefore give expression to ideas that might be highly beneficial, preferring to insure nondisturbance in their positions by going along in the old routine. They should be encouraged to offer their opinions, even if the

opinions do not prove worthy of adoption in all cases.

Much progress has been made by the Boston school board under the leadership of David A. Ellis. "Our plan," he says, "has been to eliminate fads rather than to encourage them. We found the curriculum of the schools unwieldy and overgrown with unnecessary studies, which we set to work rigidly to weed out. Formerly it required nine years for a pupil to complete the course from the first grades until he entered high school. At present he gets in eight years what was taught before in nine years, and even more." Boston needs a million or two of dollars to bring its schoolhouses up to the proper standard, and the preparation of a bill for presentation to the Legislature to secure this amount was one of the objects of a special meeting of the school board within the past few days.

The conference of leading educators of this state, officials of the state's public school system and representatives of the Boston Chamber of Commerce, just held, should show good results. It will make clearer to all the fact that educational institutions must bring their courses of study into more vital relations with commercial activities. In short, the pupil must be educated in such a way that he will be assisted to earn a living. This is one of the demands of the times and of modern conditions.

At any rate, President Taft, by his frequent messages to Congress, is giving that body and the public plenty to think and to talk about. It is already evident that whether he wishes to be there or not, the President, for some time to come, is pretty sure to be kept in the political spotlight with a number of secondary luminaries lighting up the administrative stage. Even the Congressional Record gives promise of being an interesting publication for the next few months. Now is the time to subscribe.

More on the Cost of Living

SPEAKING of the "relentless increase of the cost of living" as the most portentous cloud discernible upon the political horizon at the present time, President W. C. Brown of the New York Central lines, at a dinner of the New England Club in this city on Wednesday night, summarized the causes to which this state of things is ascribed by various thinkers and theorists-the increase in the gold output among them-and finally

charged it to our failure to increase the product of the farms. This is where James J. Hill and many other students of the situation have placed the responsibility, and, no matter how many contributing causes there may be, or what their nature, this is where it is going to stick. As Mr. Brown sees it, and he is not alone in regarding the prospect from this viewpoint, the production of our farms per acre must be increased by more intelligent methods of cultivation, or we must face the day when we shall not produce food enough for our

In its inquiry into the cause of the increasing cost of living, Congress will be asked to consider, among other things, the fact that there has been almost uniform growth in every department of human activity in this country during the last twenty years, with the single exception of agriculture. The figures relating to bumper crops have blinded us to the fact that the production of foodstuffs has not kept pace with the growth of the population destined to consume them.

Results of investigations abroad have shown that the price of bread has risen steadily all through Europe in the last ten years, the increase amounting to 28 per cent. From an English board of trade report it appears that the English workman receives a decidedly higher wage and that his money goes 18 per cent farther in buying food than similar values in France or Germany. The British and German housewives each spend about 16 per cent of the food allowance on bread and flour; the French a little more than 18 per cent. On meat and fish the percentage runs at about 30 in England and France and 32 in Germany.

The price paid by consumers begins in the cost of production, and right here an attempt is made by some to place a large share of the responsibility for high prices upon the shoulders of the farmer. To the cost of production must of course be added the profits of the producer, the cost of distribution plus the profits of transporters and of the various distributers, and finally the profits of the retailer from whom the consumer obtains his commodities. The charge is made that the farmer is indifferent to the cost of his product.

The fault lies not in the profit he makes, but in his general disregard of expense of producing, which puts a heavy burden upon the consumer. Not only is more farming necessary to enable us to supply the home market at reasonable rates, but better farming as well, and there is much in the proposition that an army of trained agriculturists be sent out by the government to teach the people how to till the soil that it may bring forth fruit in abundance and without waste.

AT THE rate cotton has been dropping in price the last few days, it may soon be down once more to where people of ordinary, means can presume to buy garments made of that once popular
